

How to Access Wellmark's Drug List

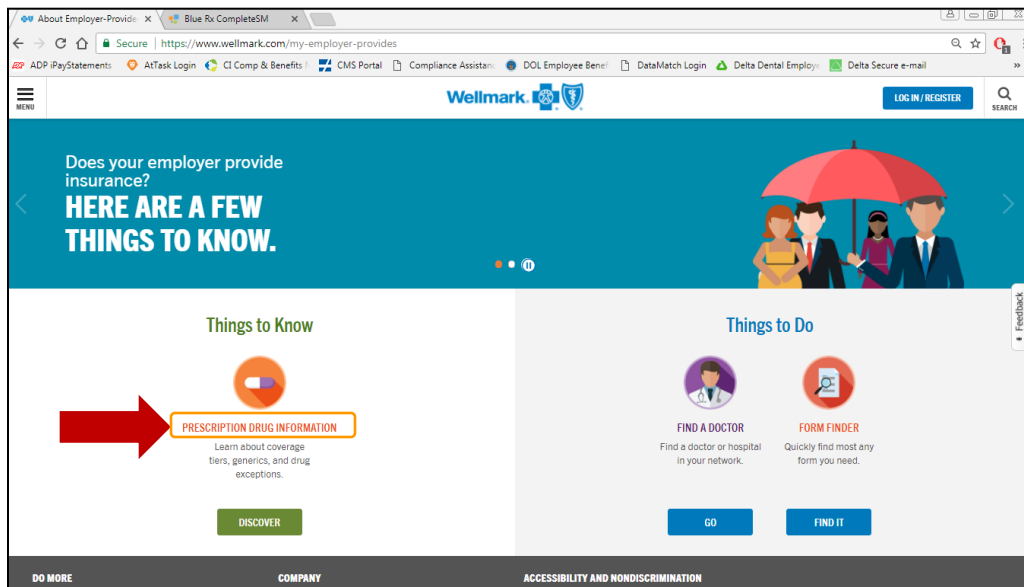

When filling a prescription, the cost of your medication will depend on which medical plan you have chosen and which drug tier the medication is under (generic, formulary/preferred, or non-formulary/non-preferred). In addition, **members enrolled in either Ruan's Basic or Choice Savings medical plans may have their pharmacy claims applied toward the annual deductible unless the drug is classified as a preventive medication.**

To see which drug tier your medication is under, or if it is classified as preventive, follow the steps below to view Wellmark's Drug List.

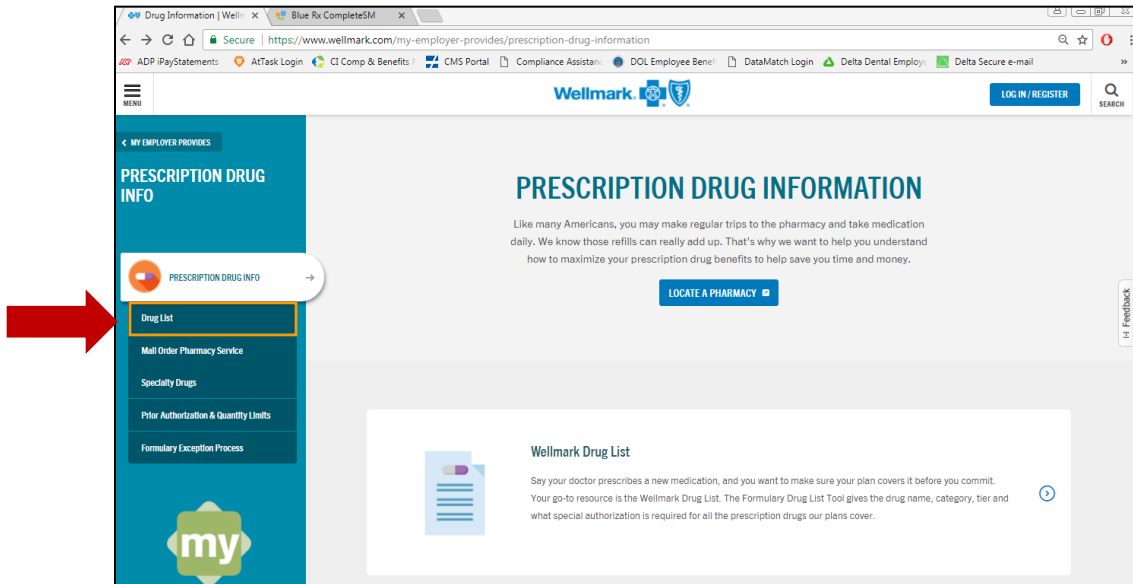

1. Visit <http://www.wellmark.com>. Under *Individuals & Families* click "My Employer Provides My Insurance".

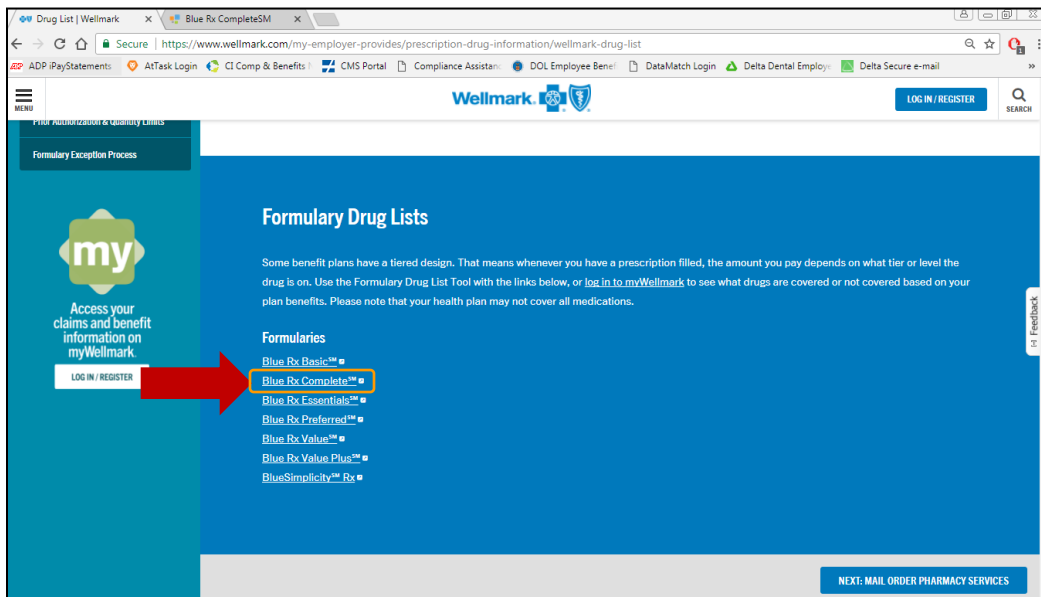

2. Click on "Prescription Drug Information".

3. On the left of the screen, click on "Drug List".

4. Scroll down and click on the "Blue Rx Complete" formulary list.

5. From this page you may look up a medication two ways:

a. Type the drug name in the search field to the left of the screen

The screenshot shows the Wellmark website interface. On the left side, there is a 'Drug Name Search' section with a dropdown menu and an input field containing 'lisinopril'. Below this is a 'By Therapeutic Class' section with a list of categories including ANALGESICS, ANESTHETICS, and AGENTS. On the right side, the page title is 'Blue Rx CompleteSM' and it includes a 'Welcome' message and a 'What is a Formulary Drug List?' section. A table titled 'Tier Designation' is visible, showing tiers 1 through 4 for different drug categories. A red arrow points to the search input field.

b. Scroll down and click on the "Printable Formulary" list.

The screenshot shows the 'Printable Files' section of the Wellmark website. It includes a heading 'Printable Files' and a paragraph: 'To view a version of your Formulary Drug List with a screen reader, please click Printable Formulary below.' Below this, there are two links: 'Printable Formulary' and 'Prior Authorization'. A red arrow points to the 'Printable Formulary' link. The rest of the page content, including the search bar and tier designation table, is visible in the background.

- Each medication will list the name, available dosages, and the drug tier the medication is under. Medications classified as "preventive" will have a code of **PV** under the "Limits & Restrictions" column.

The screenshot shows the Wellmark Drug List interface. On the left, there is a search bar with 'lisinopril' entered. Below it, there are filters for 'By Therapeutic Class'. The main content area is titled 'Drug Details' and shows a breadcrumb trail: 'CARDIOVASCULAR AGENTS > ANGIOTENSIN-CONVERTING ENZYME (ACE) INHIBITORS'. Below this is a table of search results for 'lisinopril' in various dosages (2.5 mg, 5 mg, 10 mg, 20 mg, 30 mg). The table has five columns: 'DRUG NAME', 'TIER', 'LIMITS & RESTRICTIONS', 'ALTERNATIVES', and 'DETAILS'. The 'TIER' column shows 'T1' for all entries. The 'LIMITS & RESTRICTIONS' column shows 'PV' (Preventive) for all entries. The 'ALTERNATIVES' column contains a 'Find Alternative Drugs' link for each row. A red arrow points to the 'PV' code in the first row's 'LIMITS & RESTRICTIONS' column. Another red arrow points to the 'Find Alternative Drugs' link in the same row. At the bottom of the page, there is a copyright notice and a 'Last Updated: Oct 20, 2017' date.

| DRUG NAME | TIER | LIMITS & RESTRICTIONS | ALTERNATIVES | DETAILS |
|-----------------------|------|-----------------------|------------------------|---------|
| lisinopril 2.5 mg tab | T1 | PV Preventive | Find Alternative Drugs | 🔍 |
| lisinopril 2.5 mg tab | T1 | PV Preventive | Find Alternative Drugs | 🔍 |
| lisinopril 5 mg tab | T1 | PV Preventive | Find Alternative Drugs | 🔍 |
| lisinopril 5 mg tab | T1 | PV Preventive | Find Alternative Drugs | 🔍 |
| lisinopril 10 mg tab | T1 | PV Preventive | Find Alternative Drugs | 🔍 |
| lisinopril 10 mg tab | T1 | PV Preventive | Find Alternative Drugs | 🔍 |
| lisinopril 20 mg tab | T1 | PV Preventive | Find Alternative Drugs | 🔍 |
| lisinopril 30 mg tab | T1 | PV Preventive | Find Alternative Drugs | 🔍 |

Tip to Save Money at the Pharmacy: if your medication is under a higher cost drug tier, use the online search tool to find your medication. When you locate the name of your drug, click on "Find Alternative Drugs" to see a list of comparable medications that may treat the same condition but are under a lower cost drug tier (i.e. a generic or a preferred name brand drug).
